

INTRODUCING
The Stork

**Delivering
your baby's scans
to you!**

ASCOT RADIOLOGY

At Ascot Radiology, we aim to provide all our patients with the best possible service.

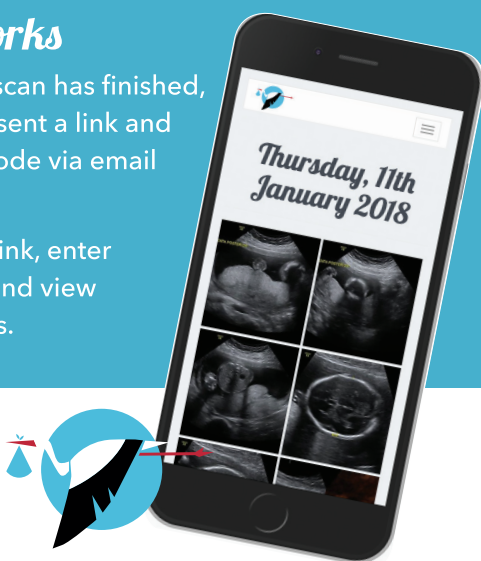

After significant customer feedback, we are no longer using CDs or flash drives to store your ultrasound images. Instead, we have partnered with **The Stork** to offer you direct, online access to your obstetric imaging.

The Stork is a cloud-based app, making it easy to view your images from any device, while also maintaining your privacy.

If you would like access to your scans online, please let your sonographer know when you arrive for your appointment.

How it works

- Once your scan has finished, you will be sent a link and an access code via email or SMS.
- Follow the link, enter your code and view your images.

Please note:

The images on The Stork are for your convenience only and should not be considered diagnostic quality. Ascot Radiology stores the original images and these are available for your referrer to access at any time.
